If we fail to obtain, maintain or renew any of these approvals or permits in a timely manner or at all, our operations and expansion plans may be interrupted, which could adversely affect our growth strategy, business and results of operations. Furthermore, our approvals and permits are subject to numerous conditions, some of which are onerous and require us to make substantial expenditures. If we fail to comply or a regulator alleges that we have not complied with these conditions, our business and results of operations could be adversely affected.

- Our Company might be unable to meet certain delivery obligations including timelines of delivery, due to which, it could become liable to claims by customers, suffer adverse publicity and incur substantial costs, which in turn could adversely affect our results of operations. Further, Imposition of liquidated damages and invocation of performance bank guarantees by our customers could impact our results of operations.***

Our Company is a growing Integrated Electrical and Automation Solution Provider dealing in comprehensive electrical solution across industries with significant presence in Marine sector. Many of our orders involve providing services that are critical to the operations of our customers business. Any failure or defect in services could result in a claim against us for substantial damages, regardless of our responsibility for such a failure or defect. Our Company has commitments for safe and timely delivery of the cargo. Any failure to meet the scheduled timelines set by our customers or loss or damage to cargo may lead to our customers raising claims against us.

Further, our contracts with our customer provide for liquidated damages for delays in delivery. In the past, we have been required to re – negotiate some of the terms such as price, date of delivery and scope of work of our contracts due to a delay in delivering the product owing to a combination of internal as well as external factors beyond our control. We were also required to pay liquidated damages for such delays. Our Company is also required to provide performance bank guarantees against which payments and mobilization advances are released by our customers upon our execution of the contracts. These performance bank guarantees and indemnity bonds require us to incur liabilities for and on behalf of our customers against all losses and damages incurred by them due to any breach of the terms and conditions of such contracts by us or due to the acts and omissions of our vendors, suppliers, collaborators and subcontractors.

Although Our Company is attempting to limit its contractual liability for all the damages, including consequential damages, while rendering the services, our Company cannot be assured that the limitations on liability it provides for, in the service contracts will be enforceable in all cases. Any time and/ or cost overruns on our contracts could have a material adverse effect on our business, financial condition and results of operations. The incurring of liabilities

pursuant to the imposition of liquidated damages as well as invocation of performance bank guarantees and indemnity bonds for multiple or large programs could have an adverse effect on our business, operations, revenues and earnings.

4. Trade Receivables form a substantial part of our current assets and net worth. Failure to manage our trade receivables could have an adverse effect on our net sales, profitability, cash flow and liquidity.

To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

5. Our business will suffer if we fail to keep pace with rapid changes in technology and the industries on which we focus.

The industry we cater is characterized by rapid technological changes, evolving industry standards, changing client preferences that could result in product obsolescence and short product life cycles. The Electrical and Automation industry is characterized by rapid technological changes, evolving industry standards, changing customer preferences that could result in short product life cycles. The success of our business depends on our ability to innovate and continuously provide services that address the varied and expanding requirements of our customers. Our future success will depend on our ability to enhance our existing offerings or develop new customized, to meet customer needs, in each case, in a timely manner.

We may not be successful in anticipating or responding to our customers' requirements on a timely and cost efficient basis, or at all. We may also be unsuccessful in stimulating customer demand for new and upgraded products and services. Additionally, during the regular course of operating our business, we may adjust our future plans as a result of our research, experience, technology evolution and market demand. We cannot guarantee that any change in technology will become successful or be more successful than our current technology.

Further, the development of some of our product and services may require significant upfront investments and the failure of these services and solutions may result in our inability to recover these investments, in part or in full. Our failure to address the demands of our customers and the rapidly evolving technology environment, particularly with respect to emerging technologies and technological obsolescence, could have a material adverse effect on our business, results of operations and financial condition.

6. Contingent liabilities could adversely affect our financial condition. Crystallization of any of these contingent liabilities may adversely affect our financial condition.

Any default in payment under such arrangement may have an adverse effect and may result into difficulty in arranging of funds for re-payment and may also adversely affect our operations and financials.

In the event that any of our contingent liabilities materialize, our business, financial condition and results of operations may be adversely affected. Furthermore, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the current fiscal year or in the future. 8. *Since our business is based on trust and identity and using the same for maintaining, acquiring and servicing our clients, it is very important for us to ensure confidentiality of our intellectual property rights. The trademark being used by us for our business are not registered and our inability to obtain this registration may adversely affect our competitive business position. We may be unable to protect them from being infringed by others, including our current and / or future competitors*

Our trademarks and patents are our material assets and are crucial to our business operations. As on the date of this Prospectus, our corporate logo “ **Marine Electricals**” is not registered. In the absence of such protection, we may not be able to prevent infringement of our trademark and a passing off action may not provide sufficient protection until such time that this registration is granted. We may still continue to use the above mentioned logo but remain vulnerable to infringement and passing-off by third parties and will not be able to enforce any rights against them. We may also need to change our logo which may adversely affect our reputation, existing brand market and business and could require us to incur additional costs.

If our unregistered trademark is registered in favour of a third party, we may not be able to claim registered ownership of the trademark and consequently, we may be unable to seek remedies for infringement of this trademark by third parties other than relief against passing off by other entities. Further, we may become subject to claims by third parties if we use the trademark in breach of any intellectual property rights registered by such third parties. Any legal proceedings pursuant to such claims, or settlements thereunder, may divert management attention and require us to pay financial compensation to such third parties. We have also not obtained any registrations for the designs developed by us in our research and design centre. Our inability to obtain or maintain these registrations may adversely affect our competitive business position.

9. *If we fail to keep our technical knowledge and process know-how confidential, we may suffer a loss of our competitive advantage.*

We possess extensive technical knowledge about our products and such technical knowledge has been developed through our own experiences. Our technical knowledge is an independent asset of ours, which may not be adequately protected by intellectual property rights such as patent registration or design registration. Some of our technical knowledge is protected only by secrecy. As a result, we cannot be certain that our technical knowledge will remain confidential in the long run. Certain proprietary knowledge may be leaked (either inadvertently or wilfully), at various stages of the manufacturing process. A significant number of our employees have access to confidential design and product information and there can be no assurance that this information will remain confidential. Moreover, certain of

our employees may leave us and join our various competitors. Although we may seek to enforce non-disclosure agreements in respect of research and development, we cannot guarantee that we will be able to successfully enforce such agreements.

10. *Orders placed by customers may be delayed, modified, cancelled or not fully paid for by our customers, which may have an adverse effect on our business, financial condition and results of operations*

We may encounter problems in executing the orders in relation to our products, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers, including delays or failure to obtain necessary permits, authorizations, permissions and other types of difficulties or obstructions, may result in the postponement of the delivery of products or cause its cancellation. Further, the order could be cancelled or there could be changes in scope and / or scheduled delivery of the products. Accordingly, it is difficult to predict with certainty if, when, and to what extent we may be able to deliver the orders placed. Failure to deliver products on time could lead to customers delaying or refusing to pay the amount, in part or full, which may adversely affect our business

In addition, even where a delivery proceeds as scheduled, it is possible that the contracting parties may default or otherwise fail to pay amounts owed. While we have not yet experienced any material delay, reduction in scope, cancellation, execution difficulty, delay or default in payment with regard to the orders placed with us, or any material disputes with customers in respect of any of the foregoing, any such adverse event in the future could materially harm our cash flow position and income. Any delay, modification, cancellation of order by our large customers may have material adverse effect on our financial condition and results of operations.

11. *Substantial portion of our revenues have been dependent upon few clients. The loss of any one or more of our major clients would have a material effect on our business operations and profitability.*

For the period ending March 31, 2018, our top ten clients accounted for approximately 59.67% of our revenue from operations. The loss of any significant client would have a material effect on our financial results. We cannot assure you that we can maintain the historical levels of business from these clients/distributors or that we will be able to replace these clients/distributors in case we lose any of them. Furthermore, major events affecting our clients, such as changes in government policies and bankruptcy, change of management, mergers and acquisitions in other cases could impact our business. If any of our major clients becomes bankrupt or insolvent, we may lose some or all of our business from that client and our receivable from that client would increase and may have to be written off, impacting our income and financial condition.

12. *We are dependent on third party transportation providers for the delivery of our raw material and products. Accordingly, continuing increases in transportation costs or unavailability of transportation services for them, as well the extent and reliability of Indian infrastructure may have an adverse effect on our business, financial condition, results of operations and prospects*

We use third party transportation providers for the delivery of our raw material and products. Transportation strikes could have an adverse effect on our receipt of raw materials and our ability to deliver our products to our customers. In addition, transportation costs in India have been steadily increasing over the past several years. Continuing increases in transportation costs or unavailability of transportation services for our products may have an adverse effect on our business, financial condition, results of operations and prospects.

In addition, India's physical infrastructure is less developed than that of many developed nations, and problems with its road networks, electricity grid, communication systems or any other public facility could disrupt our normal business activity, including our supply of raw materials and the delivery of our products to customers by third-party transportation providers. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our business operations, which could have a material adverse effect on our results of operations and financial condition.

13. Our Company has incurred substantial indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations.

As on March 31, 2018, we had ₹ 3,307.88 lakhs of outstanding debt on our balance sheet (including current maturities but excluding non-fund based) from various banks and financial institutions. In the event that we fail to meet our debt servicing obligations under our financing documents, the relevant lenders could declare us to be in default, accelerate the maturity of our obligations or takeover our project or even sell our Company's movable and immovable assets. We cannot assure investors that in the event of any such acceleration we will have sufficient resources to repay these borrowings. Failure to meet obligations under debt financing agreements may have an adverse effect on our cash flows, business and results of operations. Our ability to meet our debt service obligations and to repay our outstanding borrowings will depend primarily upon the cash flows generated by our business. We cannot assure you that we will generate sufficient cash to enable us to service existing or proposed borrowings. Incurring significant indebtedness may limit our flexibility in planning for or reacting to changes in our business & industry and limit our ability to borrow additional funds. Further, our level of indebtedness has important consequences to our Company, such as:

- Increasing our vulnerability to general adverse economic, industry and competitive conditions;
- Limiting our flexibility in planning for, or reacting to, changes in our business and the industry; affecting our credit rating;
- Limiting our ability to borrow more money both now and in the future; and
- Increasing our interest expenditure and adversely affecting our profitability, since almost all of our debt bears interest at floating rates.

If any of these risks were to materialise, our business and results of operations may be adversely affected.

14. Our Company has reported certain negative cash flows from its investing and financing activities, details of which are given below. Sustained negative cash flow could impact our growth and business in the future.

Our Company had reported certain negative cash flows from its investing and financing activities in the previous years as per the restated financial statements and the same are summarized as under:

(₹ in lakhs)

Particulars	For the year ended March 31,				
	2018	2017	2016	2015	2014
Cash flow from Operating Activities	2,348.20	929.39	75.52	831.09	947.27
Cash flow from Investing Activities	(10.29)	(842.43)	(784.86)	(779.25)	(166.20)
Cash flow from Financing Activities	507.29	(345.76)	585.58	(819.73)	158.06

For details, please refer "Management's Discussion and Analysis of Financial Conditions and Results of Operations of our Company" on page no. 209 of this Prospectus.

Cash flow of a Company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

15. Our Company may have potential Conflicts of interest with our Group Companies as they have been authorized and engaged in similar line of business.

Our Promoters have interests in other companies and entities that may compete with us, including other Group Companies that conducts businesses with operations that are similar to ours. Our Promoters have also promoted other companies and may continue to do so. For details please refer to the Chapter titled "Our Management" and "Our Promoters and Promoter Group" on page nos. 132 and 146 respectively of this Prospectus. Further, our Company has not entered into any non compete agreement with these companies and hence there can be no assurance of any conflict of interests which may arise in allocating or addressing business opportunities and strategies amongst our Company

and our Group Companies in circumstances where our interests differ from theirs. In cases of conflict, our Promoter may favour other Companies in which our Promoter has an interest. Hence, conflict of interest may occur between our business and the businesses of our Group Companies which could have an adverse effect on our business, financial condition, results of operations and prospects.

16. *Our Promoters play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoters remain associated with us. Our success also depends upon the continued services of our promoters and our ability to attract, train and retain them.*

Our Whole-time Director & Promoter, Mr. Vinay Uchil has been actively involved in Marketing, Finance and Administration functions of the Company getting and instrumental in expanding the business of the Company. Our managing director & promoter, Mr. Venkatesh Uchil has been actively involved in procurement, production and technical areas of the Company. He is actively involved in marketing of the Company, timely execution of the Industry orders and ensures that the quality control standards.

Our Promoters, along with the group key managerial personnel, have over the years built relations with clients, government agencies and other persons who are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

Further, our Promoters have also promoted other companies and may continue to do so. If they divert their attention to the other companies, we may not be able to function as efficiently and profitably as before. We may have to incur additional costs to replace the services of our promoters or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. Any inability to attract and retain talented employees or the resignation or loss of key management personnel, may have an adverse impact on our business, future financial performance and the price of our Equity Shares.

17. *We do not own certain premises used by our Company and the premises which we have leased may not be duly registered or adequately stamped.*

Various premises used by our Company have been obtained on a lease hold/ rental basis. If the owners of such leased premises do not renew the agreements under which we occupy or use the premises on terms and conditions acceptable to us, or at all, we may suffer a disruption in our operations. Further, the lease agreements which our Company has executed in relation to the above mentioned properties are not adequately stamped and registered. Unless such documents are adequately stamped or duly registered, such documents may be rendered as inadmissible as evidence in a court in India or attract penalty as prescribed under applicable law, which may result in an adverse effect on the continuance of the operations and business of our Company.

18. *Our business is not of continuous production in nature thus resulting in varied results for different operating periods as well as Balance Sheet situations.*

Compared to a normal mass manufacturing / services Company, our business is not of continuous standardized production nature. We procure raw materials for a particular order or expected order well in advance & there could be a major difference in lag timing of delivering an order depending on various matters such as Company of sector being worked; tenure of relevant order. Hence our result of operation may not be seamless / similar for different quarters or different operating periods. Further our balance sheet size with respect to working capital could vary between different operating periods depending on the stage of our production process or relevant order being worked on. Our inability to complete orders in time or monitor our inventory assets could affect our results of operations and financial conditions.

19. *There are various negative covenants in the sanction letters issued to us by our lenders, which could put us at a competitive disadvantage and could have an adverse effect on our business, results of operations and financial condition.*

The sanction letter issued to us contains provisions that restrict our ability to do, among other things, any of the following:

- Make any Restricted Payments other than as permitted;
- Wind up/liquidate its affair;
- Agree/authorize to settle any litigation/arbitration having a material adverse effect;
- Change the general nature of its business or undertake any expansion or invest in any other entity;
- Effect any change in its accounting method or policies;
- Make any amendments to its constitutional documents;
- Pay any commission to its promoters/directors/security providers;

In addition to the restrictions listed above, we are required to maintain certain financial ratios under our financing agreements. These financial ratios and the restrictive provisions could limit our flexibility to engage in certain business transactions or activities.

20. *Our registered office is not owned by us, we have entered into lease agreement for the same. In case of suspension or cancellation of lease by MIDC, there may be an effect on our business, results of operations and prospects.*

We do not own our registered office At B/1, Udyog Sadan No.3, Midc, Andheri (E), Mumbai, Maharashtra - 400093 India. We have entered into a lease agreement for the same with MIDC. Further, if we are required to relocate our registered office as a result of suspension or cancellation of lease, we may incur additional cost as a result of such relocation. If we are unable to renew the agreements pursuant to which we occupy the premises on terms and conditions acceptable to us, or at all, we may have to relocate to other places.

Any failure or difficulty faced by us continuing the lease agreement may affect our business and its prospects. For further details of our Properties, please refer to chapter titled “Our Business” beginning on page no. 98 of this Prospectus.

21. *Our Company's manufacturing activities are depend on availability of skilled and unskilled labourers. In case of unavailability of such labourers and / or inability to retain such personnel, our business operations could be affected.*

Our Company has employed 305 employees as on 30th June, 2018 employees on our payroll. The above includes employees in the Top and middle management and also employees who are part of manufacturing unit and office staff. We also engage contract labourers to facilitate our processing operations. Our operations and performance are depends on our ability to identify, attract and retain both skilled and unskilled labour. In case such labour is unavailable or we are unable to identify and retain such labourers, our business could be adversely affected.

Further, there are instances where we need to hire additional contract labour, either for specialized jobs or during periods of high customer orders. Any failure to hire the appropriate labour may impact the operations and impair our client relations.

22. *We constantly face a credit risk which may in turn affect our complete cycle adversely. Also, any customer dispute regarding our performance may amount in delay or withholding of payment to us.*

Our primary competence is the ability to provide timely deliveries and best quality products, further being able to exploit the benefits of economies of scale and credit shortage in the industry. Our business cycle is heavily dependent on timely payments being received from our customers. In case that our products are not delivered on timely basis and/or the quality of the products does not fulfil the requirements of our customer, it may lead to dissatisfaction. Further it may lead to consequence of customer dispute regarding our performance or workmanship and the customer may delay or withhold payment to us, which may result in materially affecting our business.

In case of such default in payment/ unforeseeable delay in payment from any of our customers our working capital cycle will be adversely affected. This may lead to lack of competitive advantage against various other transporters leading to an adverse effect on our business operations and profitability.

23. *The deployment of the Net Proceeds from the Fresh Issue are based on management estimates and have not been independently appraised by any bank or financial institution and is not subject to any monitoring by any independent agency and our Company's management will have flexibility in utilizing the Net Proceeds from the Fresh Issue.*

Our Company intends to primarily use the Net Proceeds from the Fresh Issue towards working capital as described in "Objects of the Issue" on page no. 75 of this Prospectus. In terms of Regulation 16 of the SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the Fresh Issue size is not in excess of ₹ 100 crores. The management of our Company will have discretion to use the Net Proceeds from the Fresh Issue, and investors will be relying on the judgment of our Company's management regarding the application of the Net Proceeds from the Fresh Issue. Our Company may have to revise its management estimates from time to time and consequently its requirements may change. Additionally, various risks and uncertainties, including those set forth in this section "Risk Factors", may limit or delay our Company's efforts to use the Net Proceeds from the Fresh Issue to achieve profitable growth in its business.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Issue, at a price and manner as specified in Chapter VI-A of the SEBI ICDR Regulations pursuant to the SEBI ICDR (Second Amendment) Regulations, 2016 dated February 17, 2016. Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilization of our Net Proceeds, even if such variation is in our interest. Further, we cannot assure you that our Promoters or the controlling shareholders will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price which may be prescribed by SEBI.

Accordingly, prospective investors in the Issue will need to rely upon our management's judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilization of Net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Issue and our business and financial results may suffer.

24. *Our insurance coverage may not adequately protect us against all material hazards, which may adversely affect our business, results of operations and financial condition.*

Our business and assets could suffer damage from fire, natural calamities, misappropriation or other causes, resulting in losses, which may not be fully compensated by insurance. There can be no assurance that the terms of our insurance policies will be adequate to cover any damage or loss suffered by our Company or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim.

Further, our Company is required to renew these insurance policies from time to time and in the event, we fail to renew the insurance policies within the time period prescribed in the respective insurance policies or not obtain at all, our Company may face significant uninsured losses. If our Company suffers a large uninsured loss or if any insured loss suffered, significantly exceeds our insurance coverage, our business, financial condition and results of operations may be adversely affected.

25. *We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.*

We may have to confront pressures in respect of pricing; product quality etc. from the clients and such pressures may put strain on our profit margins which may consequently affect the financial position of our Company. Competition emerges not only from the organized sector but also from the unorganized sector and from both small and big players. Our Competitiveness is also measured by the technology we adopt as our industry is rapidly growing in India. Our inability to compete with this intense competition; will have material adverse impact on our Company's financial position.

26. *Our Company has entered into certain related party transactions in the past and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.*

Our Company has entered into certain transactions with our related parties including our Promoter, Promoter Group, Directors and their relatives. While we believe that all such transactions have been conducted on the arm's length basis, we cannot assure you that we might have obtained more favourable terms had such transactions been entered into with unrelated parties.

Furthermore, it is likely that we may enter into related party transactions in the future. We cannot assure you that such transactions, individually or in the aggregate, will always be in the best interests of our minority shareholders and will not have an adverse effect on our business, results of operations, cash flows and financial condition. For details, please refer "Financial Statements – Related Party Transactions" on page no.164 of this Prospectus.

27. *The funds proposed to be utilised for general corporate purposes may constitute 21% of the Net Proceeds of the Fresh Issue Proceeds*

The Company intends to use the Fresh Issue Proceeds for the purposes described in the section titled "Objects of the Issue" on the page no. 75 of this Prospectus. Our Company upon finalisation of the price as per the Book Building method may utilise an amount constituting 21% of the Net proceeds of the Fresh Issue Proceeds towards general corporate purposes. The Objects for which we will be using this amount shall include capital expenditure for the various operations of our Company, strategic initiatives, meeting exigencies and approved penalties, brand building exercises or any other purposes as approved by our Board. As of date, our Board has not yet authorised any specific commitments or acts, with respect to utilisation of the portion of the Fresh Issue Proceeds which will be used for the general corporate purposes.

28. *Our success largely depends on our ability to attract and retain our Key Managerial Personnel. Any loss of our Key Managerial Personnel could adversely affect our business, operations and financial condition.*

Our Company is depending significantly on the expertise, experience, and continued efforts of our Key Managerial Personnel. If one or more members of our Key Managerial Personnel are unable or unwilling to continue in his/her present position, it may be difficult to find a replacement, and business might thereby be adversely affected. Our industry requires personnel with specific technical knowledge and experience.

Competition for Key Managerial Personnel in our industry is intense and it is possible that our Company may not be able to retain existing Key Managerial Personnel or may fail to attract/ retain new employees at equivalent positions in the future. As such, loss of Key Managerial Personnel could adversely affect our business, results of operations and financial condition. For further details on the key managerial personnel of our Company, please refer to the chapter titled "Our Management" beginning on page no. 132 of this Prospectus.

29. *In addition to normal remuneration, other benefits and reimbursement of expenses our Directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.*

Some of our Directors (including our Promoters) and Key Management Personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration, incentives or benefits and reimbursement of expenses. We cannot assure you that our Directors or our Key Management Personnel would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. Our Directors may take or block actions with respect to our business, which may conflict with our best interests or the interests of other minority Shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Directors will always act to resolve any conflicts of interest in our favour, thereby adversely affecting our business and results of operations and prospects.

30. Our Group entity Eltech India Private Limited and KDU Worldwide Technical Services FZC have incurred losses in 2 out of the last three (3) financial years.

Our Group Entity has incurred losses during the financial years preceding the current financial year, details of which are as under:

(₹ in lakhs)

Name of Company	For the year ended March 31,		
	2018	2017	2016
Eltech India Private Limited	12.80	(102.01)	(66.86)
KDU Worldwide Technical Services FZC	(16.16)	(1.14)	(0.47)
KDU Worldwide Technical Services Ghana Limited	(0.48)	(2.06)	N. A.

Further, there are some foreign domiciled group companies which have been recently incorporated and have not completed material operating activities as on their last financial period. If these entities incur material losses in the future then the same could affect our Promoters Net Worth and our Group Goodwill.

31. Our Company if not able to manage our growth or to successfully implement our business plan could have an effect on our business, results of operations and financial condition.

The success of our business will depend greatly on our ability to effectively implement our business and growth strategy. Our growth strategy involves focusing on Optimal Utilization of Resources and Increasing Operational efficiency. For further details, see the section titled “Our Business – Our Strategies” on page no. 98 of this Prospectus. Our success in implementing our growth strategies may be affected by:

- Our ability to identify new markets to expand;
- Our ability to maintain the quality of our products;
- Changes in the Indian regulatory environment in field

If our Company is not able to execute our strategy on time and within our estimated budget, or that our expansion and development plans will increase our profitability. Any of these factors could impact our results of operations. Further, we expect our growth strategy to place significant demands on our management, financial and other resources and require us to continue developing and improving our operational, financial and other internal controls. Our inability to manage our business and implement our growth strategy could have an effect on our business, financial condition and profitability.

32. Our Promoters and Promoter Group has extended personal guarantees in connection with certain of our debt facilities. There can be no assurance that such personal guarantees will be continued to be provided by our Promoters in the future or can be called at any time, affecting the financial.

Our Promoters have provided personal guarantees for our borrowings to secure our loans. If any of these guarantees are revoked, our lenders may require alternative guarantees or collateral or cancellation of such facilities, entailing repayment of amounts outstanding under such facilities. If we are unable to procure alternative guarantees satisfactory to our lenders, we may need to seek alternative sources of capital, which may not be available to us at commercially reasonable terms or at all, or to agree to more onerous terms under our financing agreements, which may limit our operational flexibility. Accordingly, our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the revocation of all or any of the personal guarantees provided by our Promoters in connection with our Company's borrowings.

33. Our Promoters and Promoter Group will continue to retain majority shareholding in us after the Issue, which will allow them to exercise significant influence over us and potentially create conflicts of interest.

Our Promoter and Promoter Group may beneficially own approximately 73.52% of our post-Issue equity share capital. As a result, the Promoter Group may have the ability to control our business including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company's best interest. In addition, for so long as the Promoter Group continues to exercise significant control over the Company, they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. The Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

34. Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may result in write-off of such amounts and thereby adversely affecting our results of operations. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

35. If our employees were to unionize or our labour costs were to increase, our results of operations may be adversely affected.

None of our employees is currently represented by a collective bargaining agreement and we believe that our non unionized operations have advantages over unionized competitors in providing reliable and cost-competitive customer services, including greater efficiency and flexibility.

However, we cannot assure you that our employees will not unionize, or attempt to unionize in the future, that they will not otherwise seek higher wages and enhanced employee benefits. The unionization of our employees could result in an increase in wage expenses and our cost of employee benefits, limit our ability to provide certain services to our customers, cause customers to limit their use of our services due to the increased potential for strikes or other work stoppages and result in increased expenditures in connection with the collective bargaining process, any of which could have a material adverse effect on our business, financial condition and results of operations.

In addition, we enter into contracts with independent contractors to complete specified assignments and these contractors are required to source the labour necessary to complete such assignments. Although we generally do not engage these labourers directly, it is possible under Indian law that we may be held responsible for wage payments to labourers engaged by contractors should the contractors default on wage payments. Any requirement to fund such payments will adversely affect us, our business, financial condition and results of operations.

Further, there is a possibility that the labour costs increase disproportionately due to increase in wage/salary demand. In this event, if we are unable to pass on the increased costs to our customers, our business operations and financial condition may be adversely affected.

36. *We may not be able to sustain effective implementation of our business and growth strategies.*

The success of our business will depend greatly on our ability to effectively implement our business and growth strategies. We may not be able to execute our strategies in the future. Further, our growth strategies could place significant demand on our management team and other resources and would require us to continuously develop and improve our operational, financial and other controls, none of which can be assured. Any failure on our part to scale up our infrastructure and management could cause disruptions to our business and could be detrimental to our long term business outlook. Further, we operate in a highly dynamic industry, and on account of changes in market conditions, industry dynamics, technological improvements or changes and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands. Our inability to implement our business strategies and sustain our growth may impair our financial growth and thus result in an adverse impact on our Company's share price.

37. *The rate of interest for the loans obtained by us from the banks is variable and any increase in interest rates may adversely affect our results of operations and financial condition.*

Our Company is susceptible to changes in interest rates and the risks arising there from. Our sanction letters provide for interest at variable rates with a provision for the periodic resetting of interest rates. Further the lenders are entitled to change the applicable rate of interest, which is a combination of a base rate that depends upon the policies of the RBI and a contractually agreed spread, and in the event of an adverse change in our Company's credit risk rating. For further details of interest payable on our borrowings, please refer to the chapter titled "*Financial Indebtedness*" on page no. 225 of this Prospectus Further, in recent years, the Government of India have taken measures to control inflation, which have included tightening the monetary policy by raising interest rates. As such, any increase in interest rates may have an adverse effect on our business, results of operations, cash flows and financial condition.

38. *Any disproportionate increase in labour costs including increase in wage/salary demand, labour unrest or labour claims arising from accidents may adversely affect our business operations and financial conditions.*

Our increasing business operations may require our employee strength to increase in future. In the past our Company has not experienced any labour unrest, but there is no assurance that it will not experience the same at any time in the future. Also, there is a possibility that the labour costs increase disproportionately due to increase in wage/salary demand. In this event, if our Company is unable to pass on the increased costs to our customers, our business operations and financial conditions may be adversely affected.

39. *In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects / schedule of implementation of this Issue which would in turn affect our revenues and results of operations.*

The funds that we receive would be utilized for the Objects of the Fresh Issue as has been stated in the Chapter "*Objects of the Issue*" on page no. 75 of the Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management's estimates. If the schedule of implementation is delayed for any other reason

whatsoever, including any delay in the completion of the Issue, we may have to revise our business, development and working capital plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

40. *The requirements of being a public listed Company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed Company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchanges which require us to file unaudited financial results on a quarterly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public Company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

EXTERNAL RISK FACTORS

41. *The Companies Act, 2013 has effected significant changes to the existing Indian Company law framework, which may subject us to higher compliance requirements and increase our compliance costs.*

A majority of the provisions and rules under the Companies Act, 2013 have recently been notified and have come into effect from the date of their respective notification, resulting in the corresponding provisions of the Companies Act, 1956 ceasing to have effect. The Companies Act, 2013 has brought into effect significant changes to the Indian Company law framework, such as in the provisions related to issue of capital, disclosures in Prospectus, corporate governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian Company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in forward dealing. Further, companies meeting certain financial thresholds are also required to constitute a committee of the board of directors for corporate social responsibility activities and ensure that at least 2% of the average net profits of the Company during three immediately preceding financial years are utilized for corporate social responsibility activities. Penalties for instances of non-compliance have been prescribed under the Companies Act, 2013, which may result in inter alia, our Company, Directors and key managerial employees being subject to such penalties and formal actions as prescribed under the Companies Act, 2013, should we not be able to comply with the provisions of the New Companies Act within the prescribed timelines, and this could also affect our reputation.

To ensure compliance with the requirements of the Companies Act, 2013 within the prescribed timelines, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention. While we shall endeavour to comply with the prescribed framework and procedures, we may not be in a position to do so in a timely manner.

The Companies Act, 2013 introduced certain additional requirements which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and complying with such provisions due to limited jurisprudence on them. In the event, our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. Additionally, some of the provisions of the Companies Act, 2013 overlap with other existing laws and regulations (such as the corporate governance norms and insider trading regulations). We may face difficulties in complying with any such overlapping requirements. Further, we cannot currently determine the impact of provisions of the Companies Act, 2013, which are yet to come in force. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

42. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

Our Company is subject to various regulations and policies. For details see section titled “Key Industry Regulations and Policies” beginning on page no. 116 of this Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

43. Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition and prospects.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations, financial condition and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

44. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse affects on our operations and financial performance.

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

45. Terrorist attacks, civil unrest and other acts of violence or war could adversely affect the financial markets and our business.

Terrorist attacks and other acts of violence or war may negatively affect the Country markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any such act might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares.

Civil disturbances have been witnessed in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events could have a negative impact on the value of share prices generally as well as the price of our Equity Shares.

46. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors’ reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets.

The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE’s benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby

resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

47. *Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business.*

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expenditures.

48. *Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares.*

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected. Further, a closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of our Equity Shares.

49. *We will prepare our financial statements from April 1, 2018 onwards under the Indian Accounting Standards ("Ind AS"). As Ind AS is different in many respects from Indian GAAP, our financial statements from April 1, 2018 may not be comparable to our historical financial statements and our financial statements for the year ending March 31, 2017 prepared under Indian GAAP may not be comparable to our financial statements for the year ending March 31, 2017 prepared under Ind AS for comparison purposes. In addition, our transition to Ind AS reporting could have an adverse effect on our business and results of operations.*

We currently prepare our financial statements under Indian GAAP. The Companies (Indian Accounting Standards) Rules, 2015 ("IAS Rules"), as amended by the Companies (Indian Accounting Standards) (Amendment) Rules, 2016, enacted changes to Indian GAAP that are intended to align Indian GAAP further with IFRS. The IAS Rules provide that the financial statements of the companies to which they apply shall be prepared and audited in accordance with Ind AS. Ind AS is different in many respects from Indian GAAP. All NBFCs and HFCs having a net worth of more than ₹ 5,000.00 million are required to mandatorily adopt Ind AS for the accounting period beginning from April 1, 2018, with comparatives for the period ending on March 31, 2017. Although any Company may voluntarily implement Ind AS for the accounting period beginning from April 1, 2015, we intend to implement Ind AS for the accounting period beginning from April 1, 2018. As there is not yet a significant body of established practice, such as interpretations of Ind AS, on which to draw in forming judgments regarding the Ind AS implementation and application, we have not determined with any degree of certainty the impact the adoption of Ind AS will have on our financial statements. However, we know that the Ind AS will change our methodology for estimating allowances for doubtful debt losses. Ind AS will require us to value our NPAs by reference to their market value (if a ready market for such loans exists) or to calculate the present value of the expected future cash flows realisable from our loans, including the possible liquidation of collateral (discounted at the loan's effective interest rate) in estimating allowances for doubtful debt losses. This may result in us recognising higher allowances for doubtful debt losses in the future, which will adversely affect our results of our operations. Accordingly, our financial statements for the period commencing from April 1, 2018 may not be comparable to our historical financial statements and our financial statements for the year ending March 31, 2017 prepared under Indian GAAP may not be comparable to our financial statements for the year ending March 31, 2017 prepared under Ind AS for comparison purposes.

In our transition to Ind AS reporting, we may encounter difficulties in the on-going process of implementing and enhancing our management information systems. Our management may also have to divert significant time and additional resources in order to implement Ind AS on a timely and successful basis. Moreover, there is increasing competition for the small number of Ind AS experienced accounting personnel available as more Indian companies begin to prepare Ind AS financial statements. Therefore, our transition to Ind AS reporting could have an adverse effect on our business and results of operations.

RISK FACTORS RELATED TO EQUITY SHARES

50. Any further issuance of Equity Shares by Our Company or sales of Equity Shares by any significant shareholders may adversely affect the trading price of the Equity Shares.

Any future issuance of Equity Shares by our Company could dilute the investors' shareholding. Any such future issuance of Equity Shares or sales of Equity Shares by any of our significant shareholders may also adversely affect the trading price of the Equity Shares, and could impact our ability to raise capital through an offering of securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares.

51. There is no existing market for our Equity Shares, and we do not know if one will develop. Our stock price may be highly volatile after the Issue and, as a result, you could lose a significant portion or all of your investment.

There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all and any trading closures at the Stock Exchanges may adversely affect the trading price of our Equity Shares. Prior to the Issue, there has not been a public market for the Equity Shares. Further, we cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchanges or how liquid that market will become. If an active market does not develop, you may experience difficulty selling the Equity Shares that you purchased. The Issue Price is not indicative of prices that will prevail in the open market following the Issue. Consequently, you may not be able to sell your Equity Shares at prices equal to or greater than the Issue Price. The market price of the Equity Shares on the Stock Exchanges may fluctuate after listing as a result of several factors, including the following:

- Volatility in the Indian and other Global Electrical and Automation industry;
- The performance of the Indian and Global Economy;
- Risks relating to our business and industry, including those discussed in this Prospectus;
- Strategic actions by us or our competitors;
- Investor perception of the investment opportunity associated with the Equity Shares and our future performance;
- Adverse media reports about us, our shareholders or Group Companies;
- Future sales of the Equity Shares;
- Variations in our quarterly results of operations;
- Differences between our actual financial and operating results and those expected by investors and analysts;
- Our future expansion plans;
- Perceptions about our future performance or the performance of Electrical and Automation sector companies generally;
- Performance of our competitors in the our industry and the perception in the market about investments in the our sector;
- Significant developments in the regulation of the industry in our key locations;
- Changes in the estimates of our performance or recommendations by financial analysts;

- Significant developments in India's economic liberalization and deregulation policies; and
- Significant developments in India's fiscal and environmental regulations. There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share

Price could fluctuate significantly as a result of market volatility. A decrease in the market price of the Equity Shares could cause you to lose some or all of your investment.

52. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, the Equity Shares at a particular point in time.*

The price of the Equity Shares will be subject to a daily circuit breaker imposed by all stock exchanges in India which does not allow transactions beyond a certain level of volatility in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by the SEBI on Indian stock exchanges. The percentage limit on our circuit breaker is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker from time to time, and may change it without our knowledge. This circuit breaker effectively limits upward and downward movements in the price of the Equity Shares. As a result, shareholders' ability to sell the Equity Shares, or the price at which they can sell the Equity Shares, may be adversely affected at a particular point in time.

53. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements, and that of our Subsidiary and the dividends they distribute to us. In the past, we have not made dividend payments to the Shareholders of our Company. The Company may decide to retain all future earnings, if any, for use in the operations and expansion of the business. In such situation, the Company may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and will depend on factors that our Board deems relevant, including among others, our future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. We cannot state with any certainty whether we will be able to pay dividends in the future. Accordingly, realization of a gain on Shareholders' investments will depend on the appreciation of the price of the Equity Shares. There is no guarantee that our Equity Shares will appreciate in value.

54. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian Company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if Securities Transaction Tax (STT) has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the equity shares are sold. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. In addition, changes in the terms of tax treaties or in their interpretation, as a result of renegotiations or otherwise, may affect the tax treatment of capital gains arising from a sale of Equity Shares.

Growth Potential Components

• *Charging Stations for Electric Vehicles*

Since the introduction of modern electric vehicles, many governments at the local and national level have promoted electric vehicle charging infrastructure in recognition of the necessity of charging stations for a mature market. However, these plans vary widely in scope and focus, reflecting the uncertainty and pace of change in this industry. Here, we summarize major government programs promoting charging infrastructure in selected markets and highlight some emerging best practices. We focus on programs to increase the stock of public charging infrastructure through subsidies, grants, and public-private partnerships.

Despite the government support and falling costs, there are still a number of challenges to the further development of global electric vehicle charging networks. Charging infrastructure still suffers from fragmentation, inconsistent data availability, and a lack of consistent standards in most markets. Open standards for vehicle–charge point communication and payment may mitigate these issues by enabling interoperability between charging networks, increasing innovation and competition, and reducing costs to drivers. Led by successful efforts in the Netherlands, a number of public and private efforts promote these open standards and a more robust market. Governments may wish to mandate data collection and the use of open standards for publicly funded projects, an approach adopted in several programs. The success of such initiatives will be increasingly important as the market grows and smart charging develops.

RENEWABLE INDUSTRY – Solar Energy

Introduction

Power sector in India is witnessing a radical change on account of government's move towards power generation via renewable energy resources. Increasing electricity consumption and surging awareness towards environment are together helping the country towards utilization of green energy resources, especially solar. Moreover, solar inverter market is exhibiting immense growth over the past few years owing to surging implementation of solar energy projects in the

country. Additionally, National Solar Mission, aiming to achieve 100 GW of solar energy by 2022 has further fueled the solar inverter adoption and is anticipated to increase the market in proportion with uprising solar industry in India.

India Solar Inverter Market is projected to grow at a CAGR over 25% during 2018-2024. The market is dominated by utility sector owing to its large scale solar projects deploying large number of solar inverters. Further, commercial segment is anticipated to exhibit highest growth rate during the forecast period. The high growth is attributed to growing solar installations across educational institutes, offices, factories, hospitals, and warehouses. In addition, residential segment is also registering significant growth with focus on sustainable development and to overlay the rising power cost in the country. Government initiatives such as Smart City project, development of solar parks, and solar energy subsidy scheme would further accelerate the adoption of solar installations across residential and commercial segments.

Moreover, among system types, on grid systems dominated the market in 2017 owing to huge adoption across different verticals, whereas, off grid systems are majorly limited to rural electrification applications only.

Road Ahead

- ***Charging Stations for Electric Vehicles***

Initiatives

Government of India is promoting the use of Electric Vehicles (EVs) in India and has ambitious to convert all vehicles into electric powered by 2030. Karnataka has become the first state in India to issue state wide **“Karnataka Electric Vehicles & Electric Storage Policy 2017”** to develop the ecosystem for EVs.

This is first of its kind electric vehicle policy issued by the state and aims to develop Bengaluru as the EVs capital of India. Government of Karnataka (GoK) approved the policy on 13 September 2017. The key objective of the Policy is to maintain the lead share of Karnataka as a preferred destination for attracting investments in manufacture of Electric Vehicle. Further, the policy aims to attract an investment of US\$ 4.75 billion (INR 310 billion) and will create about 55,000 jobs in the state.

Some of the salient features of the policy are:

1. The government will establish EVs manufacturing zones and clusters. The government will give incentives to manufacturers for producing modular design lithium-ion batteries with higher mileage per charge.

2. The policy encourages subsidies for charging infrastructure in all public and private properties, including airports, railway stations, metro stations, high-rise buildings, malls, information technology (IT) parks, and apartment complexes. The government will make amendments to building by-laws for providing mandatory charging infrastructure in all high-rise buildings.
3. The government will also create a special purpose vehicle involving Bruhat Bengaluru Mahanagara Palike (BBMP), Bengaluru Metropolitan Transport Corporation (BMTCL), Bangalore Electricity Supply Company (BESCOM), Karnataka Renewable Energy Development Ltd (KREDL), Karnataka Industrial Area Development Board (KIADB) and other agencies to create more charging infrastructure in Bengaluru and Karnataka.
4. EVs will exempt from payment of taxes from KMVT (Karnataka Motor Vehicle Taxation) Act 1957. Karnataka has one of the highest rates of motor tax in the country.
5. The government will setup Karnataka Electric Mobility Research and Innovation Centre to promote the research in the state. Further, it proposes to set up an EV skill development centre in collaboration with the industry for up skilling the work force to augment the manpower required for the EV industry. Currently, there are many companies in Karnataka which are working on electric mobility – Mahindra Electric, ANI Technologies (Ola), Bosch, Delphi and various others.
6. The policy also proposes to establish working groups with supporting grants for development of necessary technologies from concept to market in the areas of Drive technologies; Battery technologies; Charging infrastructure and network integration; standards and certification; materials and recycling; quality and training etc.
7. The government will provide incentives and concessions for EV manufacture sector, battery manufacturing, and charging equipment enterprises throughout the State including Bengaluru District in line with the Industrial Policy 2014-19.
8. The government will encourage the startup to develop a business model for EVs.

- **Railways**

Indian Railways' revenues increased at a CAGR of 9.66 per cent during FY07-FY18 to US\$ 27.71 billion in FY18. Earnings from the passenger business grew at a CAGR of 9.90 per cent during FY07-FY18 to reach US\$ 7.55 billion in 2017-18P. Freight revenue rose at a CAGR of 9.83 per cent during FY07-FY18 to reach US\$ 18.16 billion in 2017-18.

Investments

Foreign Direct Investment (FDI) inflows into Railways related components from April 2000 to December 2017 were US\$ 897.09 million.

Following are some of the major investments and developments in India's railways sector:

- In March 2018, Alstom completed production of the first all-electric locomotive at the manufacturing facility in Madhepura, Bihar.
- In May 2018, Parcel Cargo Express Train (PCET) commenced operations. The train connects the North-Eastern region with the coast as its initial and penultimate stops are New Guwahati in Assam and Kalyan in Maharashtra.

- **Metro Rails**

The metro rail network in the country is increasing with the mass rapid transit system emerging as one of the best solutions for urban transportation. Even as eight metro rail networks covering a length of 370 km are operational in the country, over two dozen more projects are lined up.

Out of the two dozen projects, around 15 are lined up with the urban development ministry. The cities that have lined up their plans include Pune, Nagpur, Ahmedabad, Chennai, Vijayawada, Kozhikode, Indore, Bhopal, Patna, Guwahati, Kanpur and Varanasi.

However, officials from states like Punjab and Madhya Pradesh, which are yet to get approval for the first metro projects in their states, said that there has been a huge delay from the Centre for their projects. Some of these states are ready for the PPP route too.

In the last three years, from 2014-2017, the urban development ministry sanctioned Rs30,653.78 crore, out of which only Rs12,345.33 crore was released to various metro rail companies in the country. Similarly, in the current fiscal year, the ministry allocated around Rs17,960 crore for metro rail companies and till the first quarter ending June only Rs4,650 crore was spent. The figures are for Uttar Pradesh, Maharashtra, Gujarat, Rajasthan, Tamil Nadu, Kerala, Karnataka, Maharashtra and Delhi-NCR region.

STRENGTHS

1. *Specialized Business Model with High Entry Barriers*

Electrical and Automation solutions have significant importance in Marine and Industrial application. In Marine, as electricity is generated, distributed and consumed in the ship only, electrical products used in Marine needs to be high quality and most reliable. The products and manufacturer has to be registered with respective authority. In Industrial and Building segments, the numbers of devices using electricity are increasing and various devices have different electrical inputs. Hence, designing system becomes very complex and requires expertise and experience to do so. We have developed expertise with our 40 years of experience in providing electrical solutions.

There are multiple entry barriers for a new entrant in our industry, such as prior experience, registration with authorities, and customer stickiness to established players. As a result, we are one of the few large players in this industry. This provides us with a significant advantage over new entrants, as they would need to invest a great deal of resources to gain a foothold in the markets in which we compete. Our products are required to meet exacting standards of quality in which they are sold, as set by the requirements our customers. We believe the high barriers to entry enable us to obtain better profit margins for our products compared to other manufacturing industries where barriers to entry are lower.

2. *In-house Engineering Capabilities*

We have commenced our business as provider of switchgear and other small products. Over a period of time, we have built engineering capabilities through organic as well as inorganic ways to become Integrated Solution Provider. We have acquired Nahari Engineering, Automatic Electric Control, STI S.R.L., Italy, Eltech Engineers Madras. We have worked in various prestigious vessels which helped in strengthening our engineering capabilities.

Our Company has a large pool of experienced engineers. We continuously train our employees which we believe enables us to serve the technical and commercial demands of our customers. We believe that our employees are instrumental to our success including for the quality of our products and services and our ability to operate in a cost-efficient manner, helping us achieve continuous profit margins, efficient operations, short delivery schedules, relatively lower attrition and fewer employee disputes.

We have an all-encompassing strength in electrical & electronic components and across the value-chain offering. Our Company provides marine electrical and electronic switch-gears, control-gears, electronic and electrical components including its accessories. Further, we also provide consultancy services in designing, fabricating, installing and repairing all types of electrical and electronic installations. We leverage this unique positioning for further growth and expansion.

3. Promoter with strong technical background

The Promoter and the senior management team of our Company have significant industry experience and have been instrumental in the consistent growth of our Company's performance. The management team has vast experience and technical know-how to help the development of the Company. Our Promoters Mr. Venkatesh Uchil and Mr. Vinay Uchil have been the main guiding force behind the growth and business strategy of our Company. We believe that our management team's experience and their understanding of our business will enable us to continue to take advantage of both current and future opportunities. It is also expected to help us on addressing and mitigating various risks inherent in our business, including significant competition. For further details on education, experience and other details of our Management and our Key Managerial Personnel, kindly refer to the Chapter titled "Our Management" beginning on page no. 132 of this Prospectus.

Our business and growth are significantly depending on our ability to maintain the client relationship. We have gained significant experience and have established track record and reputation for efficient and timely delivery of our product and services

For risks related to our business, our Company and our industry, see "Risk Factors" on page no. 17 of this Prospectus.

STRATEGIES

The key elements of our strategies are as follows:

1. Expand our Total Installed Production Capacity and Product Range

We will be taking over operation of the facility in the near future. We have proposed to increase our manufacturing capability through proposed manufacturing plants in Goa which is spread across approximately 9000 square meter. We have already entered into lease agreements with GIDC for the procurement of the land. Further, the location of the proposed plant is nearer to our existing plant, thereby giving us strategic business advantages. For further details, please refer to the "Property/Land details" of this chapter on page 98 of this Prospectus. Expanding our manufacturing unit will lower the manufacturing costs, enable cheap labour costs, cut lead times and higher the production capabilities and hence result in production efficiency.

2. Increasing Operational efficiency

We continue to invest in increasing our operational efficiency throughout the organization. Our Company constantly endeavors to improve its productivity levels by optimum resource utilization, improvement in manufacturing process, skill up-gradation of our workers, modernization of machineries to achieve better asset turnover. We will continue to further improve our manufacturing processes to identify the areas of bottlenecks and correct them. This would help us in improving efficiency and putting resources to optimal use. Further, we are addressing the increase in operational output through continuous process improvement, QC / QA activities, customer service, consistent quality and technology development. Alignment of our people to 'process improvement' through change management and upgrading of skills as required for customer satisfaction is a continuous activity. Awareness of this quality commitment is wide spread among all the employees

3. Competitive Pricing:

Our Company provides solution in Low Voltage, Medium Voltage and Industrial Automation backed by In-house Product Design & Development, Manufacturing, Installations and after sale service. Price is an important aspect of our 'business' marketing mix and changing the price can drastically affect the marketing tactics necessary for success. To remain aggressive and capitalize a good market share, we believe in offering competitive prices to our customers. This helps us to

sustain the cut-throat competition and withhold a strong position in the market. Further it helps us to prevent loss in Company's market share.

4. Increase scope of offering and entering new emerging segments

We intend to diversify our services and solution categories into other industries or marketplaces. Although our focus has always been marine control panels and other related electronics equipments. We are now venturing into the renewable energy segment. We intend to participate into growth opportunities arising out of the renewable energy sector in India. Further, such expansion will enable us to manage the overall business risks. We intend to continuously identify and introduce new solution categories into marketplaces in order to diversify and de-risk our business profile and provide potential for further growth.

5. Well Strategized Growth Plan

We have well strategized and focused growth plan in place which includes enhancing our solution offerings, geographical expansion and strengthening of our management bandwidth. This plans helps us to establish realistic objectives and goals that are in line with our long term vision in place with constant focus on quality and innovation. To keep sailing on it, we stress on and constantly strive to improve the quality of our products. We have a qualified team which constantly works for product management, improving the quality.. We are expanding our marketing team to enhance our geographic presence. We are strengthening our management bandwidth with induction of senior and experience people regularly

The above timetable is indicative and does not constitute any obligation on our Company or the BRLM. Whilst our Company shall ensure that all steps for the completion of the necessary formalities for the listing and the commencement of trading of the Equity Shares on the Stock Exchanges are taken within 6 Working Days of the Bid/Issue Closing Date, the timetable may change due to various factors, such as extension of the Bid/Issue Period by our Company, revision of the Price Band or any delay in receiving the final listing and trading approval from the Stock Exchanges. The commencement of trading of the Equity Shares will be entirely at the discretion of the Stock Exchanges and in accordance with the applicable laws.

Bids and any revision in Bids will be accepted only between 10.00 a.m. and 5.00 p.m. (Indian Standard Time) during the Bidding Period at the Bidding centers mentioned in the Bid-cum-Application Form or, in case of Bids submitted through ASBA, at the Designated Branches (a list of such branches is available at the website of the SEBI) or with the members of the Syndicate at the Specified Locations or with the Registered Brokers at the Broker Centers (a list of such Broker Centers is available at the websites of the Stock Exchanges), as the case may be. On the Bid/Issue Closing Date, Bids shall be accepted only between 10.00 a.m. and 3.00 p.m. (Indian Standard Time) and uploaded until (i) 4.00 p.m. in case of Bids by Non-Institutional Bidders; and until (ii) 5.00 p.m. or such extended time as may be permitted by the Stock Exchanges, in case of Bids by Retail Individual Bidders, after taking into account the total number of applications received up to the closure of timings and reported by BRLM to the Stock Exchanges. It is clarified that Bids not uploaded on the electronic bidding system would be rejected.

Due to limitation of time available for uploading the Bids on the Bid/Issue Closing Date, the Bidders are advised to submit their Bids one day prior to the Bid/Issue Closing Date and, in any case, no later than 3.00 p.m. (Indian Standard Time) on the Bid/Issue Closing Date. Any time mentioned in the Red Herring Prospectus, unless specifically mentioned otherwise, is in Indian Standard Time. Bidders are cautioned that in the event a large number of Bids are received on the Bid/Issue Closing Date, as is typically experienced in public offerings, which may lead to some Bids not being uploaded due to lack of sufficient time to upload, such Bids that cannot be uploaded will not be considered for allocation in the Issue. If such Bids are not uploaded, our Company and the Syndicate shall not be responsible. Bids will be accepted only on working days, i.e., Monday to Friday (excluding any public holiday). None among our Company or any member of the Syndicate is liable for any failure in uploading the Bids due to faults in any software / hardware system or otherwise.

On the Bid/Issue Closing Date, extension of time will be granted by the Stock Exchanges only for uploading the Bids received by Retail Individual Bidders, after taking into account the total number of Bids received and reported by the BRLM to the Stock Exchanges within half an hour of such closure.

In case of discrepancy in the data entered in the electronic book *vis-à-vis* the data contained in the physical Bid cum Application Form, for a particular Bidder, the details as per the Bid file received from the Stock Exchanges may be taken as the final data for the purpose of Allotment. In case of discrepancy in the data entered in the electronic book *vis-à-vis* the data contained in the physical or electronic Bid cum Application Form, for a particular ASBA Bidder, the Registrar to the Issue shall ask the relevant SCSB or the member of the Syndicate for rectified data.

It is clarified that Bids not uploaded on the electronic bidding system or in respect of which the full Bid Amount is not blocked by SCSBs would be rejected.

OVERVIEW OF THE GLOBAL AND INDIAN ECONOMY

Global Scenario

The global economy remains sluggish heading into 2018, but the growth outlook is nevertheless somewhat stronger than in recent years. On the positive side, we anticipate a few bright spots in the global economy, such as the US and Indian economies, and the marginal recovery of the Brazilian and Russian economies in 2017. Much of this boost will only be short term, however, so the base case forecast is flat over the next five years, with average annual growth rate of 3% projected through 2021. This very modest recovery will be uneven. South Asia, Sub-Saharan Africa and East Asia will see the highest level of dynamism over the next five years. On the negative side, growth in the developed market regions will continue to be weak, and Latin America will underperform relative to other emerging market regions.

(Source: https://www.atkearney.com/web/the-purchasing-chessboard/article/-/asset_publisher/9AutfSQfJm6Y/content/global-economic-outlook-2017-2021-the-all-too-visible-hand/236833)

The pickup in growth projected in the April 2017 World Economic Outlook (WEO) is strengthening. The global growth forecast for 2017 and 2018—3.6 percent and 3.7 percent, respectively—is 0.1 percentage point higher in both years than in the April and July forecasts. Notable pickups in investment, trade, and industrial production, coupled with strengthening business and consumer confidence, are supporting the recovery. With growth outcomes in the first half of 2017 generally stronger than expected, upward revisions to growth are broad based, including for the euro area, Japan, China, emerging Europe, and Russia. These more than offset downward revisions for the United States, the United Kingdom, and India.

Growth prospects for emerging and developing economies are marked up by 0.1 percentage point for both 2017 and 2018 relative to April, primarily owing to a stronger growth projection for China. The country's 2017 forecast (6.8 percent, against 6.6 percent in April) reflects stronger growth outturns in the first half of 2017 as well as more buoyant external demand. For 2018, the revision mainly reflects an expectation that the authorities will maintain a sufficiently expansionary policy mix to meet their target of doubling real GDP between 2010 and 2020. Growth forecasts have also been marked up for emerging Europe for 2017, reflecting stronger growth in Turkey and other countries in the region, for Russia for 2017 and 2018, and Brazil in 2017.

The US economy is projected to expand at 2.2 percent in 2017 and 2.3 percent in 2018. The projection of a continuation of near-term growth that is moderately above potential reflects very supportive financial conditions and strong business and consumer confidence. The downward revision relative to the April WEO forecasts (of 2.3 and 2.5 percent for 2017 and 2018, respectively) reflects a major correction in US fiscal policy assumptions. Given the significant policy uncertainty, IMF staff's macroeconomic forecast now uses a baseline assumption of unchanged policies, whereas the April 2017 WEO built in a fiscal stimulus from anticipated tax cuts. Over a longer horizon, US growth is expected to moderate. Potential growth is estimated at 1.8 percent, reflecting the assumption of continued sluggish growth in total factor productivity and diminished growth of the workforce due to population aging. Indian Scenario

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organisation (CSO) and International Monetary Fund (IMF) and it is expected to be one of the top three economic powers of the world over the next 10-15 years, backed by its strong democracy and partnerships.. Indian economy is expected to grow at a rate of 6.7 per cent in the year 2017-18 and in the next financial year 2018-19 the economy is expected to grow at a rate of 7.2 per cent. The improvement in India's economic fundamentals has accelerated in the year 2015 with the combined impact of strong government reforms, Reserve Bank of India's (RBI) inflation focus supported by benign global commodity prices.

(Source: <https://www.ibef.org/economy/indian-economy-overview>)

During September 2017, eight core infrastructure industries grew by 5.2 per cent, as compared to 4.9 per cent growth in August 2017 and 5.3 per cent growth in September 2016. The growth of core industries during April-September 2017 was 3.3 per cent, as compared to 5.4 per cent growth during the same period last year.

Overall growth in the Index of Industrial Production (IIP) was 3.8 per cent in September 2017, as compared with 4.3 per cent growth in August 2017 and 5.0 per cent growth in September 2016. During April-September 2017, IIP growth was 2.5 per cent as compared to growth of 5.9 per cent during the same period last year.

Foreign exchange reserves were US\$ 398.8 billion as on October 27, 2017, as against US\$ 370 billion in March 2017. (Source: *Indian Economic Development and Growth Monthly Economic Report- www.ibef.org*)

Economic growth is projected to remain strong and India will remain the fastest growing G20 economy. The increase in public wages and pensions will support consumption. Private investment will recover gradually as excess capacity diminishes, and the landmark Goods and Services Tax and other measures to improve the ease of doing business are being implemented. However, large non-performing loans and high leverage of some companies are holding back investment. Monetary policy is projected to remain tight as inflation expectations have still not fully adjusted down. The need to reduce the relatively high public-debt-to-GDP ratio leaves little room for fiscal stimulus.

Growth Potential Components

- *Charging Stations for Electric Vehicles*

Since the introduction of modern electric vehicles, many governments at the local and national level have promoted electric vehicle charging infrastructure in recognition of the necessity of charging stations for a mature market. However, these plans vary widely in scope and focus, reflecting the uncertainty and pace of change in this industry. Here, we summarize major government programs promoting charging infrastructure in selected markets and highlight some emerging best practices. We focus on programs to increase the stock of public charging infrastructure through subsidies, grants, and public-private partnerships.

Despite the government support and falling costs, there are still a number of challenges to the further development of global electric vehicle charging networks. Charging infrastructure still suffers from fragmentation, inconsistent data availability, and a lack of consistent standards in most markets. Open standards for vehicle-charge point communication and payment may mitigate these issues by enabling interoperability between charging networks, increasing innovation and competition, and reducing costs to drivers. Led by successful efforts in the Netherlands, a number of public and private efforts promote these open standards and a more robust market. Governments may wish to mandate data collection and the use of open standards for publicly funded projects, an approach adopted in several programs. The success of such initiatives will be increasingly important as the market grows and smart charging develops.

RENEWABLE INDUSTRY – Solar Energy

Introduction

Power sector in India is witnessing a radical change on account of government's move towards power generation via renewable energy resources. Increasing electricity consumption and surging awareness towards environment are together helping the country towards utilization of green energy resources, especially solar. Moreover, solar inverter market is exhibiting immense growth over the past few years owing to surging implementation of solar energy projects in the country. Additionally, National Solar Mission, aiming to achieve 100 GW of solar energy by 2022 has further fueled the solar inverter adoption and is anticipated to increase the market in proportion with uprising solar industry in India.

India Solar Inverter Market is projected to grow at a CAGR over 25% during 2018-2024. The market is dominated by utility sector owing to its large scale solar projects deploying large number of solar inverters. Further, commercial segment is anticipated to exhibit highest growth rate during the forecast period. The high growth is attributed to growing solar installations across educational institutes, offices, factories, hospitals, and warehouses. In addition, residential segment is also registering significant growth with focus on sustainable development and to overlay the rising power cost in the country. Government initiatives such as Smart City project, development of solar parks, and solar energy subsidy scheme would further accelerate the adoption of solar installations across residential and commercial segments.

Moreover, among system types, on grid systems dominated the market in 2017 owing to huge adoption across different verticals, whereas, off grid systems are majorly limited to rural electrification applications only.

Road Ahead

- **Charging Stations for Electric Vehicles**

Initiatives

Government of India is promoting the use of Electric Vehicles (EVs) in India and has ambitious to convert all vehicles into electric powered by 2030. Karnataka has become the first state in India to issue state wide **“Karnataka Electric Vehicles & Electric Storage Policy 2017”** to develop the ecosystem for EVs.

This is first of its kind electric vehicle policy issued by the state and aims to develop Bengaluru as the EVs capital of India. Government of Karnataka (GoK) approved the policy on 13 September 2017. The key objective of the Policy is to maintain the lead share of Karnataka as a preferred destination for attracting investments in manufacture of Electric Vehicle. Further, the policy aims to attract an investment of US\$ 4.75 billion (INR 310 billion) and will create about 55,000 jobs in the state.

Some of the salient features of the policy are:

1. The government will establish EVs manufacturing zones and clusters. The government will give incentives to manufacturers for producing modular design lithium-ion batteries with higher mileage per charge.
2. The policy encourages subsidies for charging infrastructure in all public and private properties, including airports, railway stations, metro stations, high-rise buildings, malls, information technology (IT) parks, and apartment complexes. The government will make amendments to building by-laws for providing mandatory charging infrastructure in all high-rise buildings.
3. The government will also create a special purpose vehicle involving Bruhat Bengaluru Mahanagara Palike (BBMP), Bengaluru Metropolitan Transport Corporation (BMTCL), Bangalore Electricity Supply Company (BESCOM), Karnataka Renewable Energy Development Ltd (KREDL), Karnataka Industrial Area Development Board (KIADB) and other agencies to create more charging infrastructure in Bengaluru and Karnataka.
4. EVs will exempt from payment of taxes from KMVT (Karnataka Motor Vehicle Taxation) Act 1957. Karnataka has one of the highest rates of motor tax in the country.
5. The government will setup Karnataka Electric Mobility Research and Innovation Centre to promote the research in the state. Further, it proposes to set up an EV skill development centre in collaboration with the industry for upskilling the work force to augment the manpower required for the EV industry. Currently, there are many

companies in Karnataka which are working on electric mobility – Mahindra Electric, ANI Technologies (Ola), Bosch, Delphi and various others.

6. The policy also proposes to establish working groups with supporting grants for development of necessary technologies from concept to market in the areas of Drive technologies; Battery technologies; Charging infrastructure and network integration; standards and certification; materials and recycling; quality and training etc.
7. The government will provide incentives and concessions for EV manufacture sector, battery manufacturing, and charging equipment enterprises throughout the State including Bengaluru District in line with the Industrial Policy 2014-19.
8. The government will encourage the startup to develop a business model for EVs.

- **Railways**

Indian Railways' revenues increased at a CAGR of 9.66 per cent during FY07-FY18 to US\$ 27.71 billion in FY18. Earnings from the passenger business grew at a CAGR of 9.90 per cent during FY07-FY18 to reach US\$ 7.55 billion in 2017-18P. Freight revenue rose at a CAGR of 9.83 per cent during FY07-FY18 to reach US\$ 18.16 billion in 2017-18.

Investments

Foreign Direct Investment (FDI) inflows into Railways related components from April 2000 to December 2017 were US\$ 897.09 million.

Following are some of the major investments and developments in India's railways sector:

- In March 2018, Alstom completed production of the first all-electric locomotive at the manufacturing facility in Madhepura, Bihar.
- In May 2018, Parcel Cargo Express Train (PCET) commenced operations. The train connects the North-Eastern region with the coast as its initial and penultimate stops are New Guwahati in Assam and Kalyan in Maharashtra.

- **Metro Rails**

The metro rail network in the country is increasing with the mass rapid transit system emerging as one of the best solutions for urban transportation. Even as eight metro rail networks covering a length of 370 km are operational in the country, over two dozen more projects are lined up.

Out of the two dozen projects, around 15 are lined up with the urban development ministry. The cities that have lined up their plans include Pune, Nagpur, Ahmedabad, Chennai, Vijayawada, Kozhikode, Indore, Bhopal, Patna, Guwahati, Kanpur and Varanasi.

However, officials from states like Punjab and Madhya Pradesh, which are yet to get approval for the first metro projects in their states, said that there has been a huge delay from the Centre for their projects. Some of these states are ready for the PPP route too.

In the last three years, from 2014-2017, the urban development ministry sanctioned Rs30,653.78 crore, out of which only Rs12,345.33 crore was released to various metro rail companies in the country. Similarly, in the current fiscal year, the ministry allocated around Rs17,960 crore for metro rail companies and till the first quarter ending June only Rs4,650 crore was spent. The figures are for Uttar Pradesh, Maharashtra, Gujarat, Rajasthan, Tamil Nadu, Kerala, Karnataka, Maharashtra and Delhi-NCR region.

STRENGTHS

1. *Specialized Business Model with High Entry Barriers*

Electrical and Automation solutions have significant importance in Marine and Industrial application. In Marine, as electricity is generated, distributed and consumed in the ship only, electrical products used in Marine needs to be high quality and most reliable. The products and manufacturer has to be registered with respective authority. In Industrial and Building segments, the numbers of devices using electricity are increasing and various devices have different electrical inputs. Hence, designing system becomes very complex and requires expertise and experience to do so. We have developed expertise with our 40 years of experience in providing electrical solutions.

There are multiple entry barriers for a new entrant in our industry, such as prior experience, registration with authorities, and customer stickiness to established players. As a result, we are one of the few large players in this industry. This provides us with a significant advantage over new entrants, as they would need to invest a great deal of resources to gain a foothold in the markets in which we compete. Our products are required to meet exacting standards of quality in which they are sold, as set by the requirements our customers. We believe the high barriers to entry enable us to obtain better profit margins for our products compared to other manufacturing industries where barriers to entry are lower.

2. *In-house Engineering Capabilities*

We have commenced our business as provider of switchgear and other small products. Over a period of time, we have built engineering capabilities through organic as well as inorganic ways to become Integrated Solution Provider. We have acquired Nahari Engineering, Automatic Electric Control, STI S.R.L., Italy, Eltech Engineers Madras. We have worked in various prestigious vessels which helped in strengthening our engineering capabilities.

Our business and growth are significantly depending on our ability to maintain the client relationship. We have gained significant experience and have established track record and reputation for efficient and timely delivery of our product and services

STRATEGIES

The key elements of our strategies are as follows:

1. *Expand our Total Installed Production Capacity and Product Range*

We will be taking over operation of the facility in the near future. We have proposed to increase our manufacturing capability through proposed manufacturing plants in Goa which is spread across approximately 9000 square meter. We have already entered into lease agreements with GIDC for the procurement of the land. Further, the location of the proposed plant is nearer to our existing plant, thereby giving us strategic business advantages. For further details, please refer to the “Property/Land details” of this chapter on page 98 of this Prospectus. Expanding our manufacturing unit will lower the manufacturing costs, enable cheap labour costs, cut lead times and higher the production capabilities and hence result in production efficiency.

2. *Increasing Operational efficiency*

We continue to invest in increasing our operational efficiency throughout the organization. Our Company constantly endeavors to improve its productivity levels by optimum resource utilization, improvement in manufacturing process, skill up-gradation of our workers, modernization of machineries to achieve better asset turnover. We will continue to further improve our manufacturing processes to identify the areas of bottlenecks and correct them. This would help us in improving efficiency and putting resources to optimal use. Further, we are addressing the increase in operational output through continuous process improvement, QC / QA activities, customer service, consistent quality and technology development. Alignment of our people to ‘process improvement’ through change management and upgrading of skills as required for customer satisfaction is a continuous activity. Awareness of this quality commitment is wide spread among all the employees

3. *Competitive Pricing:*

Our Company provides solution in Low Voltage, Medium Voltage and Industrial Automation backed by In-house Product Design & Development, Manufacturing, Installations and after sale service. Price is an important aspect of our business' marketing mix and changing the price can drastically affect the marketing tactics necessary for success. To remain aggressive and capitalize a good market share, we believe in offering competitive prices to our customers. This helps us to sustain the cut-throat competition and withhold a strong position in the market. Further it helps us to prevent loss in Company's market share.

4. *Increase scope of offering and entering new emerging segments*

We intend to diversify our services and solution categories into other industries or marketplaces. Although our focus has always been marine control panels and other related electronics equipments. We are now venturing into the renewable energy segment. We intend to participate into growth opportunities arising out of the renewable energy sector in India. Further, such expansion will enable us to manage the overall business risks. We intend to continuously identify and introduce new solution categories into marketplaces in order to diversify and de-risk our business profile and provide potential for further growth.

5. Well Strategized Growth Plan

We have well strategized and focused growth plan in place which includes enhancing our solution offerings, geographical expansion and strengthening of our management bandwidth. This plans helps us to establish realistic objectives and goals that are in line with our long term vision in place with constant focus on quality and innovation. To keep sailing on it, we stress on and constantly strive to improve the quality of our products. We have a qualified team which constantly works for product management, improving the quality.. We are expanding our marketing team to enhance our geographic presence. We are strengthening our management bandwidth with induction of senior and experience people regularly

The manufacturing process of the Company initiates with the Technical Specification (TS), followed by Bill of Material (BOM), Drawings and Single Line Diagram (SLD) and further requirements are sent to purchase department. Issue of the drawings and specification to production and fabrication is done by Quality Control Department followed by development of the design.

The next step is Fabrication of the mechanical design including sheet scanning through Computer Numerical Control (CNC), punching, binding, fabrication, welding, drilling, powder coating, baking. Once the outer body of the product is prepared, assembly of the structure is done followed by mounting plate, bus bar and wiring. The panel is checked by quality control before offering it for testing as per Quality Assurance Plan.

This process starts can be divided broadly into the following phases:

PROCUREMENT OF RAW MATERIALS:

UTILITIES

Raw Materials:

1	Circuit Breaker	A circuit breaker is an automatically operated electrical switch designed to protect an electrical circuit from damage caused by excess current from an overload or short circuit. Its basic function is to interrupt current flow after a fault is detected. The modern power system deals with huge power network and huge numbers of associated electrical equipments. During short circuit fault or any other types of electrical fault these equipment as well as the power network suffer a high stress of fault current in them which may damage the equipment and networks permanently.
2	Cr Steel Sheet	The Panels is of cubical type construction, fabricated from angles/formed channels of mild steel to the required profile by welding to form rigid structure suitable for direct mounting. The doors and covers shall be fabricated from sheet steel. The complete Panels is designed to form rigid structure meeting best required Standards.
3	Copper Bus Bars	In electric power distribution, a busbar (also <i>bus bar</i>) is a metallic strip or <i>bar</i> , typically housed inside switchgear, panel boards, and busway enclosures for local high current power distribution.
4	Switchgears	In an electric power system, <i>switchgear</i> is the combination of electrical disconnect switches, fuses or circuit breakers used to control, protect and isolate electrical equipment. This type of equipment is directly linked to the reliability of the electricity supply.
5	Cables	All wiring carried out by using flexible copper conductor panel wiring FRLS type cable of 1000V grade. Wiring will run in approved trunking or alternatively laced to form neat looms and secured to prevent dislocation damage under the specified operating
6	Relays	A relay is an electrically operated switch. Many relays use an electromagnet to mechanically operate a switch, but other operating principles are also used, such as solid-state relays. Relays are used where it is necessary to control a circuit by a

		separate low-power signal, or where several circuits must be controlled by one signal.
7	Transformer	A transformer is a static electrical device that transfers electrical energy between two or more circuits through electromagnetic induction
8	Alluminium Busbars	The busbar formed from rectangular cross section, hard drawn, high conductivity, electrolytic grade copper adequately rated for the thermal, mechanical and electromagnetic condition likely to be experienced. All copper work will be supported by insulated mount and clamps of non-hygroscopic materials
9	Variable Frequency Drive	A variable-frequency drive is a type of adjustable-speed drive used in electro-mechanical drive systems to control AC motor speed and torque by varying motor input frequency and voltage
10	Push Button	A <i>push-button</i> (also spelled <i>pushbutton</i>) or simply <i>button</i> is a simple <i>switch</i> mechanism for controlling some aspect of a machine or a process. <i>Buttons</i> are typically made out of hard material, usually plastic or metal.
11	Contact Block	The <i>contact block</i> rating of a switching device is the electrical load that the device is capable of switching. Although <i>contact blocks</i> are usually rated for maximum conditions, there is a practical low load limit that the <i>contacts</i> will switch in a reliable manner.
12	Indicating Lamp	These indicating lamps are the preferred choice for hazardous area indication. They offer standard indicating lamp size, (22.5mm hole), and a short mounting depth. Most of all, they are intrinsically safe. This means that the connections may be accessed in a hazardous area and no bulky EExe junction boxes are required.

The Batteries Rules, *inter alia*, list out the registration requirements and responsibilities of manufacturers, importers, assemblers, re-conditioners and dealers. The Batteries Rules have been amended pursuant to the Batteries (Management and Handling) Amendment Rules, 2010 to provide greater clarity in the definition of bulk consumers and to enable State PCB to monitor compliance with the Batteries Rules more efficiently.

3. **The Electricity Act, 2003 ("Electricity Act")**

The Electricity Act consolidates the laws relating to generation, transmission, distribution, trading and use of electricity. It lays down provisions in relation to transmission and distribution of electricity. It states that the State Government can specify suitable measures for specifying action to be taken in relation to any electric line or electrical plant, or any electrical appliance under the control of a consumer for the purpose of eliminating or reducing the risk of personal injury or damage to property or interference with its use.

Environmental Laws

The major statutes in India which seek to regulate and protect the environment against pollution related activities in India are the Water (Prevention and Control of Pollution) Act 1974, the Air (Prevention and Control of Pollution) Act, 1981 and the Environment Protection Act, 1986 and the rules and regulations thereunder and The Hazardous Wastes (Management, Handling and Transboundary Movement) Rules, 2008. Pollution Control Boards ("**PCBs**"), which are vested with diverse powers to deal with water and air pollution, have been set up in each state to control and prevent pollution. The PCBs are responsible for setting the standards for the maintenance of clean air and water, directing the installation of pollution control devices in industries and undertaking investigations to ensure that industries are functioning in compliance with the standards prescribed. All industries and factories are required to obtain consent orders from the PCBs, and these orders are required to be renewed annually.

- **Water (Prevention and Control of Pollution) Act, 1974 ("Water Act")**

The Water Act prohibits the use of any stream or well for the disposal of polluting matter, in violation of the standards set down by the State Pollution Control Board ("**State PCB**"). The Water Act also provides that the consent of the State PCB must be obtained prior to opening of any new outlets or discharges, which are likely to discharge sewage or effluent.

- **Air (Prevention and Control of Pollution) Act, 1981 ("Air Act")**

The Air Act requires that any individual, industry or institution responsible for emitting smoke or gases by way of use as fuel or chemical reactions must apply in a prescribed form and obtain consent from the State PCB prior to commencing any activity. The consent may contain conditions relating to specifications of pollution control equipment to be installed. Within a period of four (4) months after the receipt of the application for consent the State PCB shall, by order in writing and for reasons to be recorded in the order, grant the consent applied for subject to such conditions and for such period as may be specified in the order, or refuse consent.

- **Environment Protection Act, 1986 ("EPA")**

The EPA has been enacted with an objective of protection and improvement of the environment and for matters connected therewith. As per this Act, the Central Government has been given the power to take all such measures for the purpose of protecting and improving the quality of the environment and to prevent environmental pollution. Further, the Central Government has been given the power to give directions in writing to any person or officer or any authority for any of the purposes of the Act, including the power to direct the closure, prohibition or regulation of any industry, operation or process.

- **Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 ("**Hazardous Waste Rules**")**

The Hazardous Waste Rules define the term "hazardous waste" and any person who has control over the affairs of a factory or premises or any person in possession of the hazardous or other waste is classified as an "occupier". In terms of the Hazardous Waste Rules, occupiers have been, *inter alia*, made responsible for safe and environmentally sound handling of hazardous wastes generated in their establishments and are required to obtain license/ authorisation from the respective State PCB for generation, processing, treatment, package, storage, transportation, use, collection, destruction, conversion, offering for sale, transfer or similar activities in relation to hazardous waste. The Hazardous Waste Rules also prescribe the hierarchy in the sequence of priority of prevention, minimization, reuse, recycling, recovery and co-processing. Further, State PCBs are mandated to prepare an inventory of the waste generated, waste recycled, recovered and utilized including co-processed, re-exported and disposed, based on annual returns received from occupiers and operators, and submit it to the Central Pollution Control Board on an annual basis.

- **Water (Prevention & Control of Pollution) Cess Act, 1977 ("**Water Cess Act**") and Water (Prevention & Control of Pollution) Cess Rules, 1978 ("**Water Cess Rules**")**

The Water Cess Act has been enacted to provide for the levy and collection of a cess on water consumed by persons carrying on certain industries and by local authorities, with a view to augment the resources of the central and State PCB for the prevention and control of water pollution constituted under the Water Act. 5.6 BASIS OF ALLOCATION

- (a) The SEBI ICDR Regulations, 2009 specify the allocation or Allotment that may be made to various categories of Bidders/Applicants in an Issue depending on compliance with the eligibility conditions. Certain details pertaining to the percentage of Issue size available for allocation to each category is disclosed overleaf of the Bid cum Application Form and in the RHP/Prospectus. For details in relation to allocation, the Bidder/ Applicant may refer to the RHP/Prospectus.
- (b) Under-subscription in any category (except QIB Portion) is allowed to be met with spillover from any other category or combination of categories at the discretion of the Issuer and in consultation with the BRLM and the Designated Stock Exchange and in accordance with the SEBI ICDR Regulations, 2009. Unsubscribed portion in QIB Category is not available for subscription to other categories.
- (c) In case of under subscription in the Issue, spill-over to the extent of such under subscription may be permitted from the Reserved Portion to the Issue. For allocation in the event of an under-subscription applicable to the Issuer, Bidders/ Applicants may refer to the RHP.
- (d) **Illustration of the Book Building and Price Discovery Process** Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors.

Bidders can bid at any price within the price band. For instance, assume a price band of ₹ 20 to ₹ 24 per share, issue size of 3,000 equity shares and receipt of five bids from bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the equity shares of the issuer Company at various prices and is collated from bids received from various investors.

Bid Quantity	Bid Price (₹)	Cumulative Quantity	Subscription
500	24	500	16.70%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.70%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to issue the desired number of equity shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The issuer, in consultation with the book running lead managers, will finalise the issue price at or below such cut-off price, i.e., at or below ₹ 22.00. All bids at or above this issue price and cut-off bids are valid bids and are considered for allocation in the respective categories.

(e) **Alternate Method of Book Building**

In case of FPOs, Issuers may opt for an alternate method of Book Building in which only the Floor Price is specified for the purposes of Bidding ("**Alternate Book Building Process**").

The Issuer may specify the Floor Price in the RHP or advertise the Floor Price at least one Working Day prior to the Bid/ Issue Opening Date. QIBs may Bid at a price higher than the Floor Price and the Allotment to the QIBs is made on a price priority basis. The Bidder with the highest Bid Amount is allotted the number of Equity Shares Bid for and then the second highest Bidder is Allotted Equity Shares and this process continues until all the Equity Shares have been allotted. RIBs, NIBs and Employees are Allotted Equity Shares at the Floor Price and Allotment to these categories of Bidders is made proportionately. If the number of Equity Shares Bid for at a price is more than available quantity then the Allotment may be done on a proportionate basis. Further, the Issuer may place a cap either in terms of number of specified securities or percentage of issued capital of the Issuer that may be Allotted to a single Bidder, decide whether a Bidder be allowed to revise the bid upwards or downwards in terms of price and/or quantity and also decide whether a Bidder be allowed single or multiple bids.

SECTION 6: ISSUE PROCEDURE IN FIXED PRICE ISSUE

Applicants may note that there is no Bid cum Application Form in a Fixed Price Offer. As the Issue Price is mentioned in the Fixed Price Issue therefore on filing of the Prospectus with the RoC, the Application so submitted is considered as the application form.

Applicants may only use the specified Application Form for the purpose of making an Application in terms of the Prospectus which may be submitted through the Designated Intermediary.

Applicants may submit an Application Form either in physical form to the any of the Designated Intermediaries or in the electronic form to the SCSB or the Designated Branches of the SCSBs authorising blocking of funds that are available in the bank account specified in the Application Form only ("ASBA Account"). The Application Form is also made available on the websites of the Stock Exchanges at least one day prior to the Bid/ Issue Opening Date.

In a fixed price Offer, allocation in the net offer to the public category is made as follows: minimum fifty per cent to Retail Individual Bidders; and remaining to (i) individual investors other than Retail Individual Bidders; and (ii) other Applicants including corporate bodies or institutions, irrespective of the number of specified securities applied for. The unsubscribed portion in either of the categories specified above may be allocated to the Applicants in the other category. For details of instructions in relation to the Application Form, Bidders/Applicants may refer to the relevant section of the GID.

SECTION 7: ALLOTMENT PROCEDURE AND BASIS OF ALLOTMENT

The Allotment of Equity Shares to Bidders/Applicants other than Retail Individual Bidders and Anchor Investors may be on proportionate basis. For Basis of Allotment to Anchor Investors, Bidders/Applicants may refer to RHP/Prospectus. No Retail Individual Bidder will be allotted less than the minimum Bid Lot subject to availability of shares in Retail Individual Bidder Category and the remaining available shares, if any will be Allotted on a proportionate basis. The Issuer is required to receive a minimum subscription of 90% of the Net Issue (excluding any Offer for Sale of specified securities). However, in case the Issue is in the nature of Offer for Sale only, then minimum subscription may not be applicable.

7.1 ALLOTMENT TO RIBs

Bids received from the RIBs at or above the Issue Price may be grouped together to determine the total demand under this category. If the aggregate demand in this category is less than or equal to the Retail Category at or above the Issue Price, full Allotment may be made to the RIBs to the extent of the valid Bids. If the aggregate demand in this category is greater than the allocation to in the Retail Category at or above the Issue Price, then the maximum number of RIBs who can be Allotted the minimum Bid Lot will be computed by dividing the total number of Equity Shares available for Allotment to RIBs by the minimum Bid Lot ("**Maximum RIB Allottees**"). The Allotment to the RIBs will then be made in the following manner:

- (a) In the event the number of RIBs who have submitted valid Bids in the Issue is equal to or less than Maximum RIB Allottees, (i) all such RIBs shall be Allotted the minimum Bid Lot; and (ii) the balance available Equity Shares, if any, remaining in the Retail Category shall be Allotted on a proportionate basis to the RIBs who have received Allotment as per (i) above for the balance demand of the Equity Shares Bid by them (i.e. who have Bid for more than the minimum Bid Lot).
- (b) In the event the number of RIBs who have submitted valid Bids in the Issue is more than Maximum RIB Allottees, the RIBs (in that category) who will then be Allotted minimum Bid Lot shall be determined on the basis of draw of lots.

7.2 ALLOTMENT TO NIBS

Bids received from NIBs at or above the Issue Price may be grouped together to determine the total demand under this category. The Allotment to all successful NIBs may be made at or above the Issue Price. If the aggregate demand in this category is less than or equal to the Non-Institutional Category at or above the Issue Price, full Allotment may be made to NIBs to the extent of their demand. In case the aggregate demand in this category is greater than the Non-Institutional Category at or above the Issue Price, Allotment may be made on a proportionate basis up to a minimum of the Non-Institutional Category.

7.3 ALLOTMENT TO QIBs

For the Basis of Allotment to Anchor Investors, Bidders/Applicants may refer to the SEBI ICDR Regulations, 2009 or RHP/Prospectus. Bids received from QIBs Bidding in the QIB Category (net of Anchor Portion) at or above the Issue Price may be grouped together to determine the total demand under this category. The QIB Category may be available for Allotment to QIBs who have Bid at a price that is equal to or greater than the Issue Price. Allotment may be undertaken in the following manner:

- (a) In the first instance allocation to Mutual Funds for up to 5% of the QIB Category may be determined as follows: (i) In the event that Bids by Mutual Fund exceeds 5% of the QIB Category, allocation to Mutual Funds may be done on a proportionate basis for up to 5% of the QIB Category; (ii) In the event that the aggregate demand from Mutual Funds is less than 5% of the QIB Category then all Mutual Funds may get full Allotment to the extent of valid Bids received above the Issue Price; and Equity Shares remaining unsubscribed, if any and not allocated to Mutual Funds may be available for Allotment to all QIBs as set out at paragraph 7.4(b) below;
- (b) In the second instance, Allotment to all QIBs may be determined as follows: (i) In the event of oversubscription in the QIB Category, all QIBs who have submitted Bids above the Issue Price may be Allotted Equity Shares on a proportionate basis for up to 95% of the QIB Category; (ii) Mutual Funds, who have received allocation as per (a) above, for less than the number of Equity Shares Bid for by them, are eligible to receive Equity Shares on a proportionate basis along with other QIBs; and (iii) Under-subscription below 5% of the QIB Category, if any, from Mutual Funds, may be included for allocation to the remaining QIBs on a proportionate basis.

7.4 ALLOTMENT TO ANCHOR INVESTOR (IF APPLICABLE)

- (a) Bidders may be categorized according to the number of Equity Shares applied for;
- (b) The total number of Equity Shares to be Allotted to each category as a whole may be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of Bidders in the category multiplied by the number of Equity Shares applied for) multiplied by the inverse of the over-subscription ratio;
- (c) The number of Equity Shares to be Allotted to the successful Bidders may be arrived at on a proportionate basis, which is total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio;
- (d) In all Bids where the proportionate Allotment is less than the minimum Bid Lot decided per Bidder, the Allotment may be made as follows: the successful Bidders out of the total Bidders for a category may be determined by a draw of lots in a manner such that the total number of Equity Shares Allotted in that category is equal to the number of Equity Shares calculated in accordance with (b) above; and each successful Bidder may be Allotted a minimum of such Equity Shares equal to the minimum Bid Lot finalised by the Issuer;
- (e) If the proportionate Allotment to a Bidder is a number that is more than the minimum Bid lot but is not a multiple of one (which is the marketable lot), the decimal may be rounded off to the higher whole number if that decimal is 0.5 or higher. If that number is lower than 0.5 it may be rounded off to the lower whole number. Allotment to all Bidders in such categories may be arrived at after such rounding off; and
- (f) If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares Allotted to the Bidders in that category, the remaining Equity Shares available for Allotment may be first adjusted against any other category, where the Allotted Equity Shares are not sufficient for proportionate Allotment to the successful Bidders in that category.
